

GETTING THINGS SORTED

Bike rescue organisation, Dismantle aims to enable and empower vulnerable young people to live their life in a self-directed way. Dismantle educates at risk-youth with hands-on mechanical skills, by mentoring these individuals in organising and fixing bikes. Social skills, confidence and teamwork are some of the major valuable skills learned through their Bike Rescue Program. Participants are further able to harness their own sustainable transport solutions in everyday life by using their repaired bikes.

On Monday 5 September, BHP's Supply Chain Optimisation team spent their day assisting Dismantle with various tasks within the workshop. The day started with an introduction from Georgina, Dismantle's Volunteer Coordinator who spoke about the meaning and purpose of the organisation, the services they offer, and the tasks the team would be undertaking for the duration of the day.

The team got straight into their assigned jobs, which first included heading upstairs and doing a complete sort out of their storage space - an area Dismantle are hoping to repurpose as office space in the future. The team sorted through clothing items and PPE, moved boxes, cleaned desks, sorted out computers and made the area look organised. The team then headed downstairs and got to work on stripping donated bikes for their parts, which would later be used to rebuild "new" bikes. Later in the afternoon, Georgina showed the team how to change a tire and the team decided whether the tire was fit for purpose. As the day wrapped up, the team packed away the tools, and gathered for one last team photo.

Shout out to this amazing team for contributing to a greater cause. We hope they enjoyed this hands-on activity and were able to learn some new bike skills. Dismantle staff were so grateful as these time-consuming jobs are invaluable to the organisation. Thanks BHP!
