## REUSE, REPAIR, REDUCE, RECYCLE..

Remida WA is Perth's Creative Reuse Centre! Since 2005, they have been collecting valuable resources from businesses. Their offcuts and discards provide unique resources for their education workshops and their members. Much of their work is with schools, providing a unique education for children to learn the value of recycling. Finding beauty in the unexpected, REmida WA strives to foster a cultural shift towards the revaluing of waste materials and educate for a more sustainable future.

On Thursday 6 July, volunteers from BHP's Asset West NPI & Other - RE Mine/Closure Planning team got together for a morning of repurposing and recycling donated materials with Remida at their site in West Perth.

Upon arrival, the team meet with Paul, who gave some background on Remida, where the donated items come in from, where they go and how beneficial it is for them to host corporate volunteers - allowing their own staff and volunteers to focus on other tasks. The team then split up into different stations and were delegated different jobs including breaking down wheel locks, tying shoelaces, cutting vinyl, rolling, and banding shade cloth and folding fabric. The team took turns rotating jobs throughout the morning, and achieved a huge amount of donating sorting.

Thank you BHP for making such an impact to Remida, we hope to see you again soon!
