

BHP

CARING FOR THE ENVIRONMENT

The Care for Hedland Environmental Association aims to connect people and the environment to create a more sustainable, inclusive and environmentally aware town.

On Tuesday 7th November, 5 volunteers from BHP spent the morning volunteering their time at the Hedland Community Garden, the team arrived nice and early to beat the heat.

The volunteers began picking up rubbish around the garden, shovelling horse manure into the garden beds and washing down all the plastic table and chairs. The team were also allocated the job of discarding old tomato plants in preparation for next year when they start fresh.

Towards the end of the volunteering experience it began to heat up, so a staff member from the Community Garden asked the team to pop seeds into small paper bags ready for next winter when they begin to replant.

A massive thank you goes out to this team for their commitment to the tasks thrown at them for the day. Hedland Community Garden are incredibly grateful for your support and hope you enjoyed your volunteering experience.

Well done BHP!
