## SAVING THE DAY!

The South Hedland Volunteer Fire and Rescue service is part Department of Fire and Emergency service. The volunteer firefighters cover South Hedland for all fire and rescue services. The fire station responds to over 200 incidents a year, their crews travel vast distances responding to emergencies in the community, the volunteers not only respond to emergencies in and around Port Hedland and South Hedland. The volunteers conduct training sessions once a week and respond to any emergencies they are called to respond to any time of the day or night.

On a very hot Tuesday 7th November, a team of 7 volunteers from BHP volunteered their day to help the South Hedland VFRS. The main task of the day was to finish off the project they began at the last team day, which was leveling and laying turf at the back of the station.

While the hard working team was there they also whipper snipped, sprayed weeds and gave the trucks a good clean.

A big thank you to this team for putting in a huge effort especially on such a warm day. We hope you enjoyed the volunteering experience, South Hedland VFRS was amazed by the work that was completed.

Well done BHP!
