BUSY BEE AT SOUTHCARE

Southcare is a not-for-profit organisation that provides personalised aged care and support and community services to help people live with dignity and respect in their own home and neighbourhood. They provide health, wellbeing and capacity building services to people in need so that they can stay independent, in control and make the most of their opportunities and potential. They work within the areas of aged care, finance, Aboriginal family support, leadership training and local amenities.

On Thursday, 14 September the HV & Power team joined Southcare at their main site in Manning for a big garden blitz! After a quick introduction to the tasks at hand, the team got straight to work, working alongside regular Southcare volunteer Stuart. First up, the team cleared the back garden area by moving a group of old tin garden beds to the carpark, giving them some new life with some succulents - and fixing up the broken fence at the same time. Other tasks for the day included mowing the lawns, trimming the trees and lots and lots of weeding! A huge pile of green waste was produced, ready to be loaded into the skip bin the following day. By the end of the activity, the site looked immaculate! Well done!

Thank you to this awesome team for all their efforts and for making a huge impact for Southcare. We hope you enjoyed your volunteering experience.
