

# BHP

## OWL HANDS ON DECK!

BHP work up a sweat at Birds of Prey

The Western Australian Birds of Prey Center was established in 2004, with its primary aim to rehabilitate all different types of Birds of Prey. Along with rehabilitation, the Birds of Prey team run educational sessions for schools and are home to the much loved Auzzie, a young and very proud Wedgetail Eagle, mascot to the West Coast Eagles.

Birds of Prey are currently going through a great expansion period and over the next few months will be building a new rehab center. Tasks on the agenda included gardening, removing leaves from aviary netting, cleaning and prepping the Donga bathroom for renovations and clearing the land surrounding the Donga.

The team were eager to work hard and accomplished an astounding amount of work in their half day of volunteering! By the lunch time there were 4 large piles of tree branches and organic waste ready to be burned off when winter comes.

After lunch, Yvone and Mike from Birds of Prey bought out a Barn Owl and Wedge Tail Eagle for an interactive educational session, with some of the volunteering even getting to fold these magnificent birds.

volunteeringWA

"It was good to be able to make a visual difference when volunteering (clearing leaves and raking up) and learning about the Not-For-Profit."
