

BHP

AN ENRICHING DAY

South East Regional Centre for Urban Landcare (SERCUL) is an independent community that implements strategic projects to improve the management and health of our natural resources such as waterways and ecosystems. SERCUL operates in the metropolitan and peri-urban areas of the Swan Catchment.

On 13 October, fifteen enthusiastic volunteers from BHP's NPI GTS team contributed their Wednesday to assist SERCUL at Adenia Park located in Riverton. It was a sunny and great day to be outdoors. The day started off with a quick introduction of SERCUL. The team were tasked to provide a post-vegetation enrichment support to the native plants that were recently planted at Adenia Park. Splitting into several groups, some team members were collecting mulch from a monstrous pile. After the mulch has been collected, the others transferred the mulch onto the recently planted plants.

As the day wrapped up, the monstrous pile of mulch was cleared up by the team. SERCUL greatly appreciated the team's help, time and assistance. Before the team left, Darren from SERCUL provided an educational tour around Adenia Park, explaining the importance of the salt-marsh species to the ecosystem.
